

Roc Impact has installed many crushing, grinding, and screening plants for mines, known for their rugged construction, all around the world.

Our plants are key elements in the mining of gold, silver, nickel and many other minerals.

Here are a few examples of our plants:

Quarry Projects

Roc Impact has installed many crushing, grinding, and screening plants for mines, known for their rugged construction, all around the world.

Our plants are key elements in roadwork and concrete production.

Here are a few examples of our plants:
