

ROC IMPACT

CRUSHING SOLUTIONS

• MOBILE CRUSHING GROUPS

RELIABLE AND ROBUST

Heavy duty
Robust construction,
significant mobility,
versatility and profitability.

MOBILITY AND LOW OVERALL

Mobile crushing unit /
special screening
designed for work
road

ADJUSTMENT AND MAINTENANCE

Centralized lubrication.
Machine adjustment,
simple and efficient.

CAPACITY OF 15 TO 850 T/H

Cone crusher, crusher
jaws, inclined screen,
horizontal screen, scalper
vibrating, moving conveyor.

• QUALITY AND RELIABILITY

ROC IMPACT mobile units are renowned worldwide for their construction quality, crushing efficiency, versatility and cost-effectiveness.

They can operate stand-alone or be integrated into two- or three-stage crushing applications with primary, secondary and fine grinding. If necessary, it is possible to connect a mobile screen.

Lightweight and remarkably well designed, this equipment offers exceptional performance and perfectly meets the increasingly demanding requirements of mobile grinding and crushing applications.

• NEW GENERATION MOBILE CRUSHING UNIT

Cone crusher, jaw crusher, inclined screen, horizontal screen, vibrating scalper, conveyor:

- Suitable for crushing applications in 2 or 3 phases.
- Fast transport on the road thanks to the bogie pivot.
- Benefits from ROC IMPACT after-sales service, available in Europe, Africa and worldwide.

This new generation of extremely flexible ROC IMPACT mobile units opens up numerous perspectives for public works companies, quarry operators, as well as recycling and ore processing sites.

A wide range of crushing and screening operations: from primary to finest, capacity from 12 to 850 tonnes/hour.
